

BARTH SMELTING PUBLIC MEETING Notes

- Public meetings were held on Wednesday, March 6th in the community room at the Terrell Homes property in Newark, NJ. The meeting was held to share the soil sampling results from the December 3-5, 2012 sampling event conducted in the playground area and to discuss actions taken by the EPA to break the exposure pathway and our planned sampling activities. Both the afternoon and evening sessions were well received by the community. Residents who live within the Terrell Homes and several members of the Ironbound Community Corporation (ICC) were in attendance for the both meeting sessions. We had 25 people in attendance for the afternoon meeting and 27 people in attendance for the evening meeting. This number includes representatives from Newark Housing Authority and the Newark Health Dept.
